

5/26/08

The Somno Med has really made a difference in my life. How?

- I now sleep better and I feel rested, with energy.
- I feel safe from apnea, which was a major stress for me.
- I am comfortable enough with the appliance in my mouth.
- It has helped my bruxism.
- I have escaped the C Pap, which I was unwilling to endure.
- I've been released from the sleep center for apnea.
- \* Dr. Stephen Smith approaches the Somno Med appliance with a scientific approach so every step of the process is based on fact. This is missing in many areas of study, today.

Thanks for your invention.
