After 2 weeks Somnued.

No longer snoring almost immediately stopped upon using the appliance. My wife no longer notices and stoppage on my breathing. My throat and nasal passages feel much better when I wake in the morning. I feel that I get a better night's sleep now.

The fit of the appliance was surprisingly good. I have experienced no trouble using the appliance. I expected some problems in having something in: strange in my mouth but the appliance fits so comfortably it never happened.

I have to agree with my wife's assessment that I should have done this years ago.
